

SEO / AEO & Local GBP Expert – Multi-Market Healthcare

Engagement Model: Hourly staff augmentation to support our internal marketing team.

Role Overview

Forta Health is a Series A telehealth and in-home ABA therapy provider. We are looking for an individual consultant to augment our team as an hourly expert. You will own our SEO, AEO, and GBP ecosystem, specifically optimizing for three service models: **Virtual ABA** (national/regional), **In-Home ABA** (localized Texas markets), and **In-Clinic ABA** (physical location rollouts).

Scope of Work & Ownership

- **GBP & Local Listings:** Full ownership of setup, optimization, and review-velocity engines for both In-Home footprints and physical In-Clinic locations.
- **Content & AEO Strategy:** Architecting "answer-first" content and schema tailored to Virtual, In-Home, and In-Clinic intent.
- **Per-Market Competitive Intel:** Ongoing audits against local incumbents in target metros.
- **Reporting & Analytics:** Managing weekly dashboards and monthly strategic synthesis.

How We Work

We are a highly AI-enabled marketing org (using Claude). We expect our partners to be AI-powered but strictly adhere to E-E-A-T standards for healthcare. We have in-house technical implementation resources; we are hiring you for **strategy, operational speed, and domain expertise**, not as a dev placeholder.

Requirements

- Proven healthcare/ABA/medical SEO experience.
- Expertise in balancing local (geo-routed) vs. virtual (national) search intent.
- Ability to integrate AI into HIPAA-compliant, high-quality workflows.
- Availability during US business hours.

To Apply

Please submit your proposal with your hourly rate and answers to:

1. **AI Workflow:** How do you balance AI efficiency with human-in-the-loop E-E-A-T?
2. **Three-Pronged Strategy:** How do you segment SEO for Virtual, In-Home, and In-Clinic services?

3. **Challenger Strategy:** How will you help us leapfrog established incumbents?

4. **Critique:** Where would you push back on our proposed approach?
