Editorial Streetwear

Brand Overview

A Ukrainian streetwear label born in 2019 — editorial aesthetics, bold drops, and a cult following of 90K+ on Instagram.

Distinct visual identity. Strong social proof. Clear brand attitude.

The Problem

A Strong Brand, Invisible Online

SMASH had the audience, identity, and product attitude — but the storefront did not yet communicate the brand online.

Strong offline identity. Weak digital expression.

Generic OpenCart default theme

No brand personality.
No editorial feel. Minimal visual differentiation.

No engagement mechanics

Visitors could browse products, but there was no reason to interact, return, or play.

Weak mobile experience

70%+ of traffic came from phones, but the mobile journey was not optimized for conversion.

Visual Identity

Built Dark. Built Editorial.

A fully custom OpenCart theme designed around SMASH's aesthetic — dark palette, editorial typography, campaign-first layouts.

A digital experience that finally reflects the SMASH identity and connects with the audience.

Dark editorial aesthetic

Bold. Crisp. Timeless.

Campaign-first layouts

Hero-led. Story-driven.

Strong typography & hierarchy

Clear. Confident. Impactful.

Mobile-optimized experience

Fast. Intuitive. Seamless.

Custom Module

Gamified Shopping – The Lucky Box

A custom-built mystery box module: users pick a tier, pay, and reveal a random product. Drives impulse purchases and repeat visits.

avg order ↑

session time ↑

return rate ↑

Turns shopping into an experience, not just a transaction.

1 Pick a tier

2 Pay & open

3 Reveal product

Gamified experience
Mystery, excitement, and instant reward.

Boosts key metrics
Drives AOV, engagement and repeat purchases.

Built for retention
Keeps users coming back for more.

Fair & transparent
Quality products only. No empty promises.

Mobile First

70% Mobile. Zero Compromises.

Every interaction redesigned for thumbs —
sticky cart, swipe galleries, one-tap
checkout flow, optimized load time.

Sticky Cart

Always visible.
Always one tap away.

Swipe Galleries

Smooth navigation
built for thumbs.

One-Tap Checkout

Fast, frictionless,
mobile-optimized flow.

Optimized Speed

Lightning fast load
for better UX.
